DXpedition News

Market Reef - OH0M Six Scandinavian DXers will operate from Market Reef as **OH2AP/OH0M** June 7-13. They will be on the usual DXpedition frequencies (see Issue 489) on CW, SSB, and RTTY. They'll also operate on 6 meters and Oscar 13 satellite. Operators include OH2BDQ, OH2BOZ, OH2BVE, OH2BVM, SM0CCE, and Timo, an SWL. They'll also be on as **SI8MI** from the Swedish side of the reef, which counts for Sweden for DXCC. QSL both calls to OH2AP, or direct to Box 90, SF-04401 Jarvenpaa, Finland. The operators collect stamps, and would appreciate commemorative stamps on the envelopes.

Tuvalu - T2 Pete Peterson K6EDV and Ron Wright ZL1AMO will operate from Tuvalu for about two weeks starting June 7. 80-10 meters, CW, SSB, and RTTY. Calls not yet known, but Pete has asked for T2EDV. QSL to each operator's home callsign.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Western Samoa - 5W Bing VK2BCH moves on to Western Samoa as **5W1GY** June 8-15, again SSB only. He's been active as ZK1XV on 28480 kHz 21-0200Z. Bing moves on to American Samoa KH8 and possibly Rotuma 3D after his 5W stint.

St. Pierre and Miquelon - FP Ralph Hirsch will be on from this island June 30-July 7, operating as **FP/K1RH**. All bands, including WARC bands. 25 kHz up on CW, listening up. On SSB, try 14145 kHz for Europe and Japan, or 14220 kHz for the US. He make a special effort daily at 1130-1230Z beaming Japan on 20 meters. QSL home call with SASE.

Tunisia - 3V Wolf DL4EBN is in Tunisia until June 19, and has requested operating permission. In the rather unlikely event that he gets it, he'll be on CW on 10-20 meters, listening up 1-2 kHz. QSL home call.

Shortly Noted

- **TT8CW** has been on 14250 kHz in a list operation around 0100Z. QSL to F2CW.
- Graham Currie **VK0GC** on Macquarie Island has been on 14180, 21290, and 28480 kHz, especially around 0400Z.
- Peter **ZS8MI** on Marion Island has been on 28400 at 1600Z, 21230 at 1900Z, 14180 at 12-1300Z on the long path, and 28800 kHz at 13-1400Z, often working out the pileup. QSL ZS6PT.
- **DK9FE/SV9** will be on to June 9 from Crete: 14015, 21025, and 28015 kHz.
- PA0BEA is on from Malta 9H to June 17, all bands, CW and SSB. QSL home call.
- **7J1ADJ/JD1** and **KA2IJ** are rumored to be active from Ogasawara June 7-14, including RTTY.
- The call **VQ9ZZ** has just be reissued to W1HZZ, who asks for QSLs to his home call. N4GNR, who was QSL manager for the previous VQ9ZZ operation, cannot QSL the current activity, which continues through June.
- Ontario, Canada, amateurs may use the prefix **CH3** June 7-July 7, to commemorate the 50th anniversary of the Queen Elizabeth Highway.
- The special callsign **CJ1PEI** will be on from Prince Edward Island in Canada in July, in connection with the international Scout jamboree on the island.
- The special call **HX6JUN** is active to June 12 from Utah Beach in Normandy, France, commemorating D-Day. 3550, 7015, 14015, 21015, and 28050 kHz on CW; 3750, 7080, 14215, 21215, and 28550 kHz on SSB. QSL F5AM.
- Martin **OY7ML** reports that he was unable to obtain a new callsign to thwart the persistent pirate using his call. Martin is once again active on the bands.
- John **SU1EK** says he is often on 15 meter SSB around 21260-275 kHz 01-0400Z. He tries 10 meters around 1400Z, and skeds his QSL manager W2QUV on 28746 or 29030 kHz at 1300Z or 1400Z Thursday and Friday.
- Latvian-speaking hams are invited to participate in a round-table with UQ2s Thursdays at 0500Z on 14319 kHz, and weekends at 1400Z on 28600 and 1500Z on 21360 kHz.
- VS6DO is leaving government service and his fine antenna farm, and will be reduced to a high-band vertical. There goes the big signal out of Hong Kong.
- Rumor has a Ukrainian DXer in North Korea in July.
- DX Advisory Committee Chairman Rick Roderick K5UR has appointed Ted Pauck K8NA as his Vice Chairman.
- Regulars (callsign, frequency or band, UTC): **3B8CF** 14030 0300 and 1230Z; **FK8FG** 14030 0900Z; **FR5AI/G** 14014 12-1400Z, long path; **3B9FR** 14190 12-1400Z; **KC6JC** 14205 11-1200Z; **UG6GAW** 20M SSB 0200Z; **5H3TW** 21025 2100Z or 28026 18-2300Z; **BY9GA** 21026 2330-0145Z; **JT1KAI** 15M CW 00-0200Z; **TA3F** 21300 2000Z+; **VQ9LW** 15M SSB 1800Z; **3DA0BK** 28490 0545Z long path; **HL5BDS** South Shetlands 28425 1300Z; **TL8NS** 28500 13-1500Z; **9N1MM** 21250 0130Z.
- RTTY reports: **SU1EE** 02-0300Z 20 and 15 M; **UT5RP** 14090 0145-0230Z; **VQ9ZZ** 21089 0100Z; **7X2CK** 14084 0515Z; **TA5C** 21086 1300Z; **HV3SJ** 21082 1715Z; **ZS3GB** 28088 1830Z.

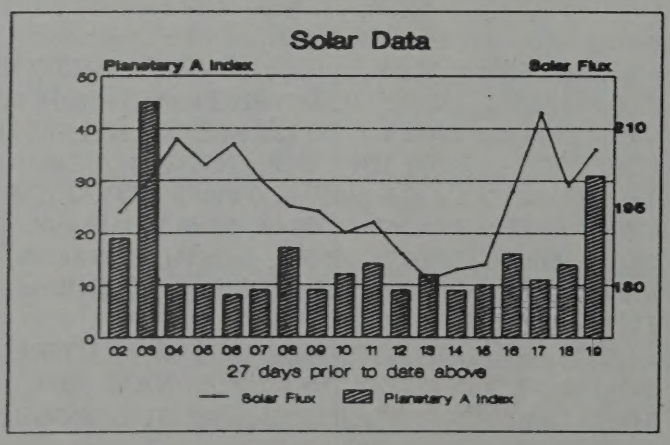
Propagation Watch

Where have all the sunspots gone? Since the beginning of the year, solar flux has not only stopped rising, but it has actually decreased, after flirting with the 300 level in January. Flux dropped below 170 below May ended.

The drop in solar activity hasn't hurt HF propagation, although 6-meter enthusiasts would appreciate high flux levels. However, increases in flux give us better band conditions, especially on long-haul, multi-hop paths. And every DX hopes that this five-month trend of decreasing solar activity does **not** mean that Cycle 22 is peaking early and low. Let's hope the activity picks up again soon.

Meanwhile, the spectacular band conditions of mid-May deteriorated slightly as the month came to an end, as geomagnetic activity picked up to minor storm levels. The increase in the A and K indices was most noticeable on the higher latitude paths, as the productive polar path and the rare 10- and 15-meter long paths late at night were wiped out by the increased geomagnetic activity.

If the solar activity holds constant for another solar revolution (27.5 days), look for good to excellent band conditions over the next two weeks, similar to mid-May. The maximum usable frequency (MUF) will drop as we approach the summer solstice on June 21, but that should only affect 12 and 10 meters. With a quiet geomagnetic field, 30-15 meters will be filled with good DX. Watch the 20-meter long path to the west at local dawn, the higher bands during the day, especially on north-south paths, and then 20 meters again far into the night. If flux levels increase rapidly, watch for the elusive 10-meter long path to the south west several hours after local sunset. Good hunting!



PacketCluster Network

On May 29, several PacketCluster DX spotting networks in the Northeast merged into a single, interconnected unit that stretches from Maine to Delaware. The Yankee Clipper Contest Club's long-standing multi-node network linked with the Tristate PacketCluster network centered on New York City, and on down the coast to the Frankfort Radio Club's Philadelphia area network. The Tristate system is sponsored by the Long Island DX Association, the North Jersey DX Association, and the Connecticut DX Club. The linked system has 11 nodes, and 77 connected users the first night. The system will operate as a unit, except during major contests.

This multi-node system joins two other large Packetcluster systems. The Southeast PacketCluster Network has five nodes in four states and can be accessed from Kentucky to Georgia. The Northern California PacketCluster Network has nine nodes, and covers a region of northern California similar in size to the newly linked system in the northeast.

PacketCluster is a registered trademark of Pavillion Software, Box 803, Hudson MA 01749.

Africa Report

Tom Gregory N4NW concludes his operation as **9Q5NW** on June 7, and returns to the US. Tom made about 43,000 QSOs from Zaire during the past four years, as well as thousands more from other countries in the region, such as the Congo (TN4NW) and Central African Republic (TL8TG). Tom operated on all bands 160-6 meters, and all modes, including RTTY.

During his five-day operation as TL8TG in May, Tom made about 1,700 QSOs, about half on CW. While in the country, He retuned the triband quad of Margie TL8DN. Tom reports that Margie does know CW, but at 5 wpm speed. He says some more TL8 licensees may come on the air soon, but they are not experienced DXers.

Dick **9Q5DX** has also left Zaire, but Bernie HB9CVX is quite active as **9Q5XX**, and Sig WA9INK, who is presently active as **SU1EE**, will start a two-year tour of duty in Zaire this Fall. Sig is interested in following up Tom's Congo operation, but his chances are unknown at this time.

QSL 9Q5XX, TL8TG, and 5N/N4NW via Tom Brown KC4NC, 742 B West 21st Street, Norfolk VA 23517. QSL 9Q5NW and TN4NW via AL7EL. Self addressed, stamped envelopes (SASEs) are requested by both managers. Tom will assume QSL duties from his operations at the end of 1989, and warns that he'll delete the logs from his computer at the end of 1990.

Ocean Island Report

Jim Smith VK9NS reports that he and Bob KN6J made over 27,000 QSOs from Banaba (Ocean) Island as **T33JS** and **T33RA** (RTTY only). Band breakdown shows about 6,400 QSOs on 10, 7,900 on 15, 9,500 on 20, 1,600 on 40, 700 on 75/80, and 50 on 160 meters. Bob made over 800 RTTY QSOs, and they even made 150 on 6 meters. Their operation was delayed because the Kiribati government commandeered their boat. Jim's beam never made it to Tarawa, but he borrowed a beam from T30AC for the trip. Jim will start QSLing soon.
